SPECIALISED COATING SERVICES

ABOUT US

SPECIALISED COATING SERVICES (SCS). Become involved with Oil and gas industry in Saudi Arabia in 1991 Our company has become synonymous with protective coating for pressure vessels, columns, and pipelines and structural. We are committed to provide our customers with the highest attainable levels of product quality and integrity in accordance with clients specified and contractual Requirements. Services:

Abrasive blasting and painting

Shot Peening

*Blasting & painting of Valves, pressure vessels,
heat exchangers, tanks etc....*

Fireproofing

Surface Preparation Sandblasting

We utilize coal slag/ Garnet abrasive blasting, pressure and chemical cleaning, power and mechanical methods of surface preparation. In a constantly changing regulatory environment and with new technologies emerging, you can count on SCS's experience to ensure your surface preparation project is performed accurately and safely.

We have experienced abrasive blasters approved by Saudi Aramco/Sabir.

SCS perform Grit/Garnet blasting on pipelines, pipe supports, ring girders, flat or irregular surfaces such as valves, fittings, platforms, steel beams, anchors, concrete foundations, vessels and heat exchangers.

Industrial Coating

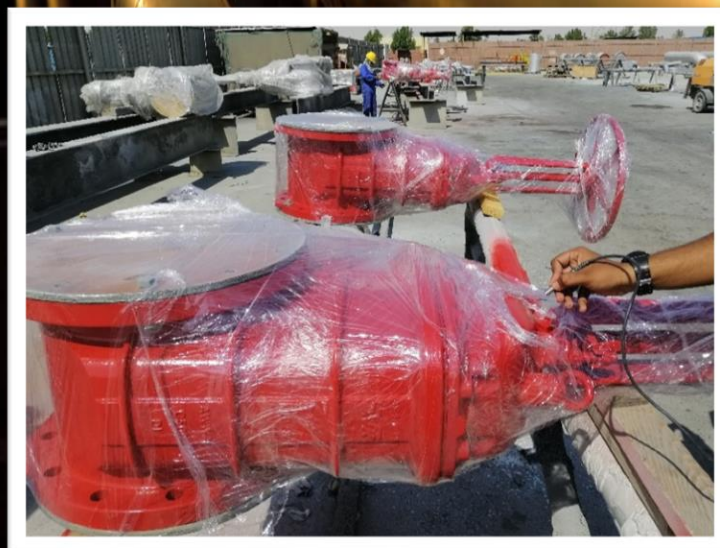

SCS has become synonymous with protective coating for pressure vessels, columns, and pipelines and structural. We are committed to provide our customers with the highest attainable levels of product quality and integrity in accordance with clients specified and contractual Requirements.

Your long-term assets are valuable and protecting them is our top priority.

Major adding value to our company is the labor force and resources to perform

Client projects driven by schedule, budget, experience, technology, economies scale or project specific parameters. Give us your challenge and we will help you develop a solution.

The method of application of paint systems and the conditions of application have a significant effect on the quality and durability of the coating. Standard methods used to apply paints to structural steelwork include application by brush, roller, conventional air spray and airless spray.

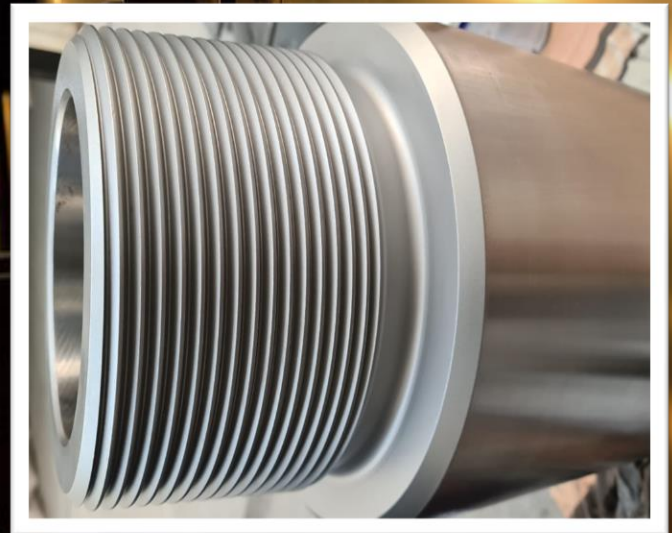

Shot peening.

Shot peening is a very popular method for the introduction of favorable compressive residual stresses in the surface of components to increase their fatigue life. It is a process whereby small balls of iron or steel shot are bombarded at the component surface at high velocity. **WHY SHOT PEENING COMPONENTS?**

- ❖ ENHANCES FATIGUE STRENGTH
- ❖ IMPROVES ULTIMATE STRENGTH
- ❖ PREVENTS CRACKING DUE TO WEAR
- ❖ PREVENTS HYDROGEN EMBRITTLEMENT
- PREVENTS CORROSION

We have NADCAP Certified Inspectors and trained shot peeners for Shot peening.

we offer shot peening with steel, stainless steel, ceramic, or glass bead media and Almen testing to verify the intensity of the peening process, as well as ensure full peening coverage. We follow MIL-S-13165, AMS-S-13165, AMS2430, and SAE J 2441-2000 shot peening standards and support a variety of industries including automotive, aerospace, and oil& gas industries.

SHOT PEENING ON THE INTERNAL WELDED JOINT
WAS SUCCESSFULLY COMPLETED ON TANK

Fire Protection Coating

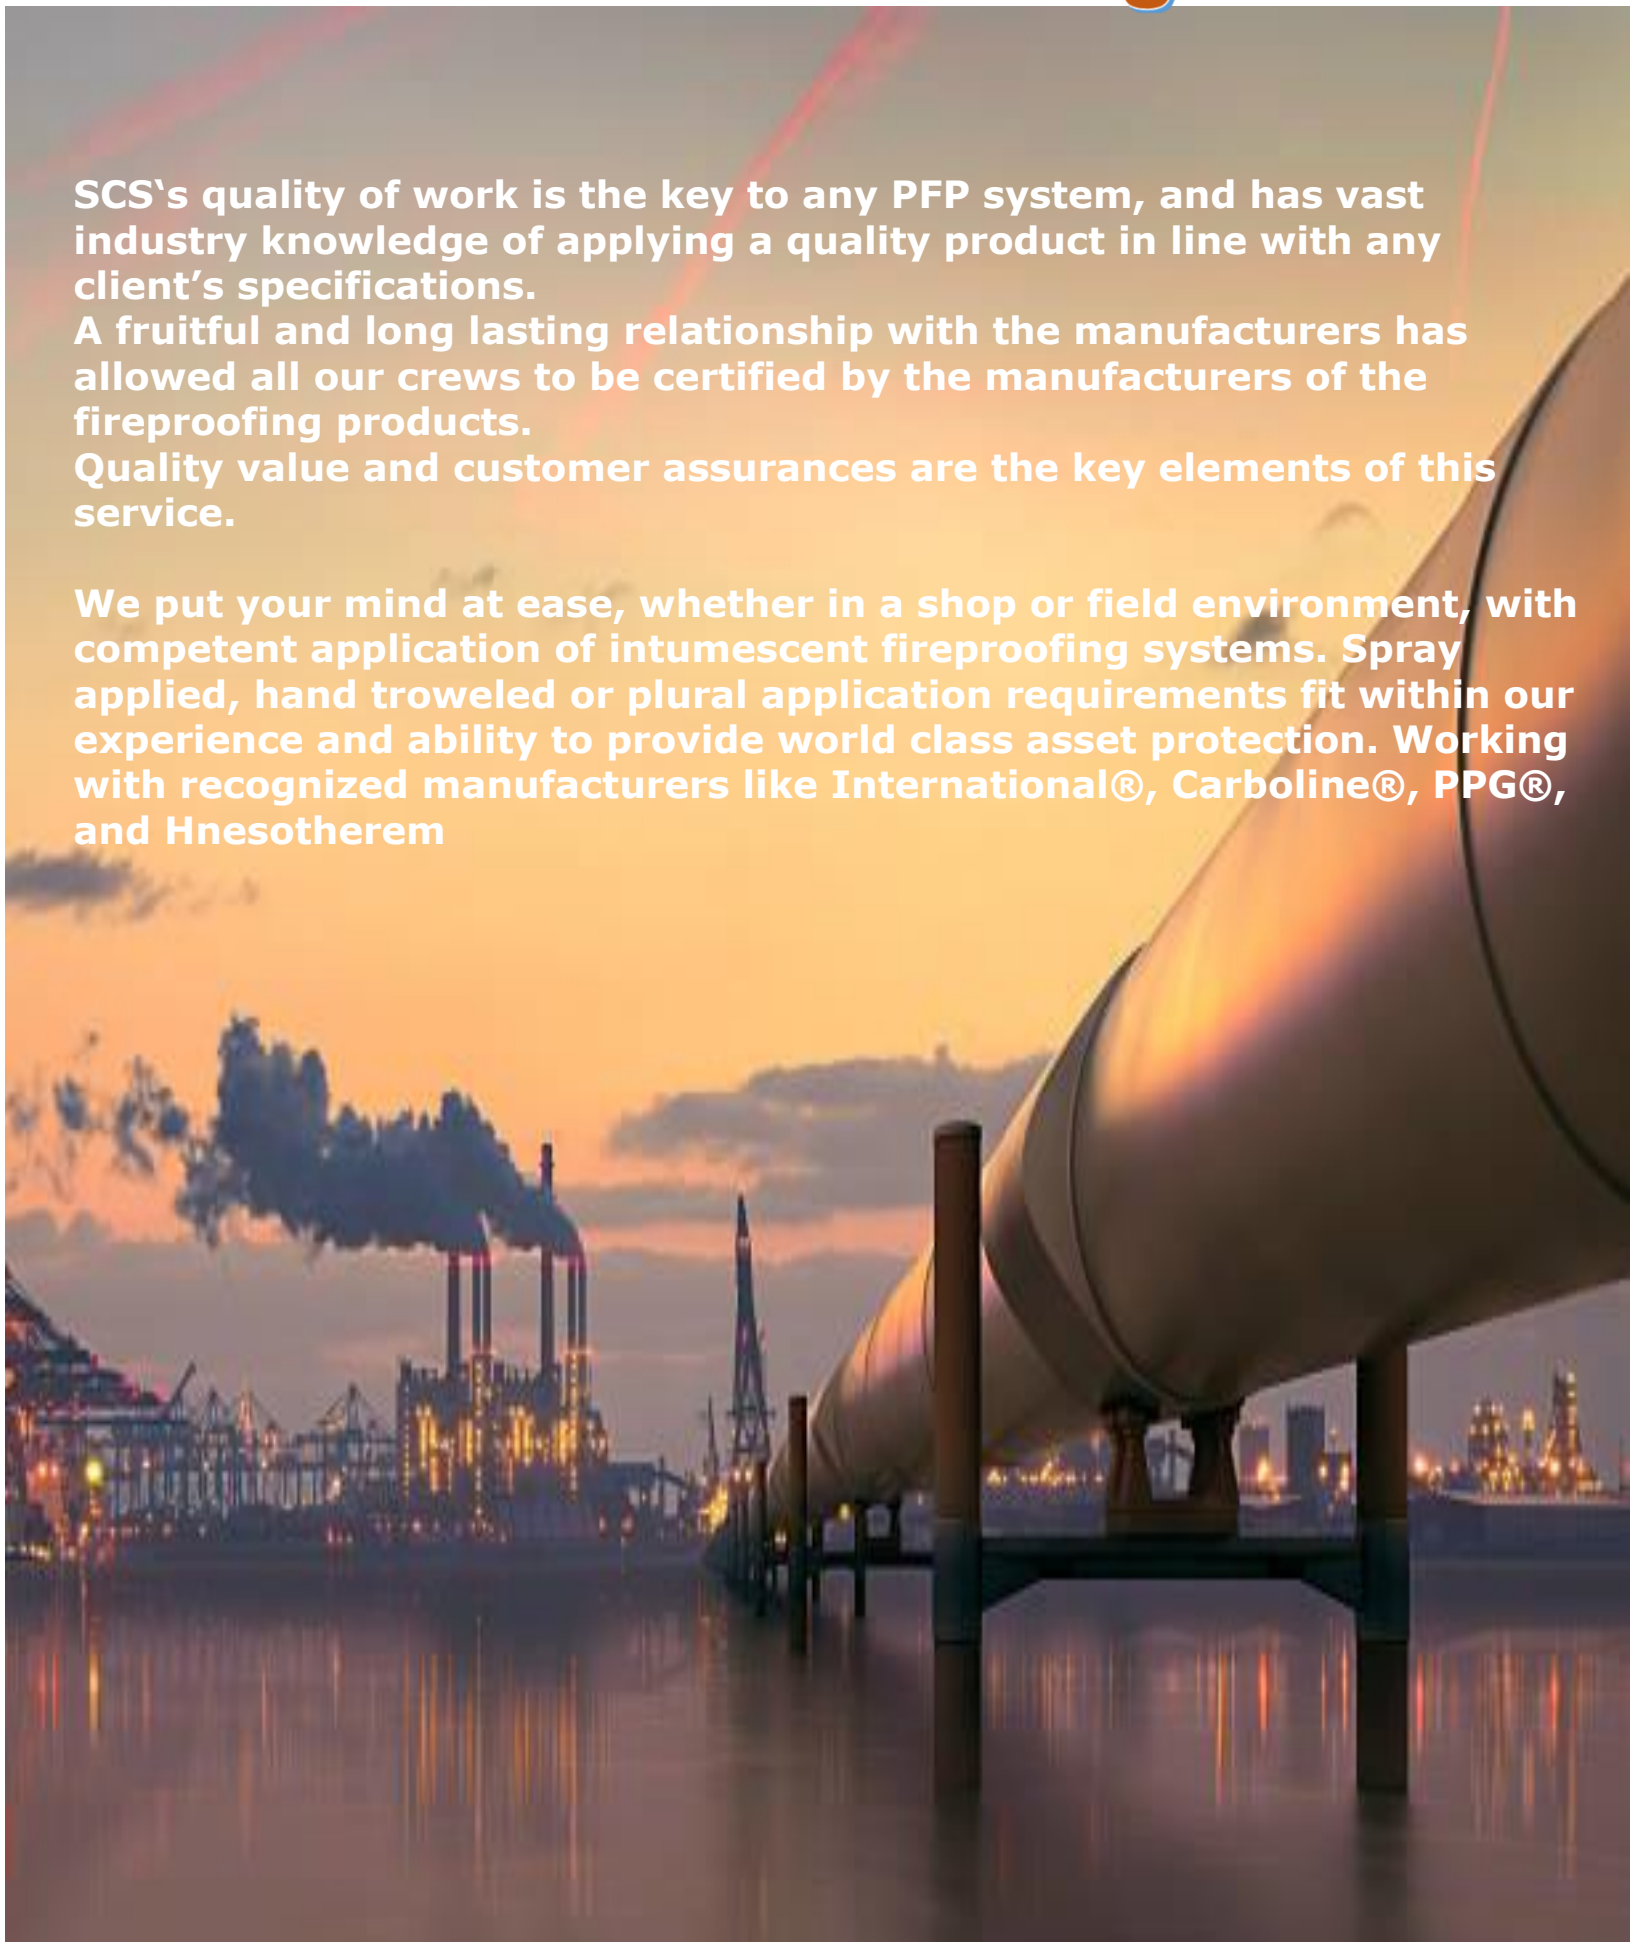

SCS's quality of work is the key to any PFP system, and has vast industry knowledge of applying a quality product in line with any client's specifications.

A fruitful and long lasting relationship with the manufacturers has allowed all our crews to be certified by the manufacturers of the fireproofing products.

Quality value and customer assurances are the key elements of this service.

We put your mind at ease, whether in a shop or field environment, with competent application of intumescent fireproofing systems. Spray applied, hand troweled or plural application requirements fit within our experience and ability to provide world class asset protection. Working with recognized manufacturers like International®, Carbolite®, PPG®, and Hnesotherm

OUR CLIENTS

SCS is Providing quality of service starts with our people and we are committed to developing competent and highly motivated personnel that are united in delivering performance excellence.
